Question No. 1

In the load balancing mode, what is the correct way for each server to handle hot standby?

- **A.** The DHCP server does not automatically associate with the relay on the device. The server will send dhcp request packets to the device.
- **B.** The DHCP server and the relay on the device can be adaptively linked. The server does not actively send protocol packets to the device.
- **C.** The RADIUS/Portal Server does not need to configure the IP address of the peer device, and the server does not actively send COA/DM or Portal logoff packets to the device.
- **D.** The RADIUS/Portal Server needs to be configured with the IP address of the peer device, and the server will send the COA/DM or Portal logoff packets to the device.

Answer: B, D

Question No. 2

In the WLAN network with WIDS enabled, what is the correct statement about the illegal device counter-function?

- **A.** When the AC determines that the device is a rogue AP, it notifies the monitoring AP of the rogue AP. The monitoring AP sends a broadcast deauthentication frame as an illegal AP.
- **B.** When the AC determines that the device is a rogue AP, it notifies the monitoring AP of the rogue AP. The monitoring AP sends a unicast deauthentication frame as an illegal AP.
- **C.** When the AC determines that the device is an illegal user terminal, the monitoring AP uses the BSSID or MAC address of the illegal device to send a unicast deauthentication frame.
- **D.** When the AC determines that the device is an illegal user terminal, the monitoring AP uses the BSSID or MAC address of the illegal device to send a broadcast deauthentication frame.

Answer: A, C

Question No. 3

The following is true about the passive detection of neighbors?

- **A.** The AP passively receives neighbor messages to sense the presence of neighboring neighbor APs.
- **B.** Passive detection can be used by legitimate APs to collect actual interference between APs.
- **C.** Passive detection can be used by legitimate APs to collect interference from illegal APs.
- **D.** Passive detection is mainly used to establish neighbor relationships between legal APs.

Answer: B, C

Question No. 4

In the WLAN Layer 2 networking environment, can the AP discover the AC in any of the following ways?

- **A.** Multicast
- **B.** Unicast
- **C.** Broadcast
- **D.** Anycast

Answer: B, C

Question No. 5

What are the methods for breaking the multi-MPP network in Huawei?

- **A.** STP
- **B.** MSTP
- **C.** TTL
- **D.** Repeat frame number detection

Answer: A, B
